Fig. S2. Kernel density of log10 transformed home range (Km2) in PanTHERIA database (Jones et al. 2009) plus other available source (solid line; n=894) and the datasets used to derive the models in this study. Home range data for maximum distance (dashed line; n=150), median distance (dashed/dotted line; n=58) and mean distance models (dotted line; n=73).
